

St. Joseph's Long-Term Care COVID-19 update

Monday, April 4th, 2022

Details	#	Special Considerations
Active Positive Resident Cases	1	Over the weekend, several residents from multiple areas of the home became symptomatic for COVID-19. One resident has a confirmed positive PCR test, and a number of staff have tested positive on their Rapid Antigen test. As a result, the home areas of Canary Path, Hummingbird Way, and Lilac Lane have been placed under heightened surveillance. Face shields and daily test will be required until further notice.
*Residents Awaiting results of PCR test	2	
Active Positive Staff Cases	1	
**Staff being monitored (this includes positive staff cases)	10	
***Staff returned to work	131	
<p>Additional information for today. Please see the family update that was emailed to you this morning.</p>		

Explanatory notes

*There are a number of reasons why residents undergo a PCR test:

- Admission / readmission
- Symptomatic of COVID 19
- Positive results on a RA test
- High risk exposure
- Surveillance testing

**Staff can be monitored for a number of reasons such as:

- They are confirmed positive
- They have tested positive on a rapid antigen test and are awaiting results of a PCR test
- they are symptomatic but have not tested positive
- they are a close contact of someone who has tested positive

***Not all staff absences are due to testing positive for COVID 19. They may have been away due to the reasons listed in the "Monitoring" section above.

Please note that the total number of cases listed on the Brant County Health Unit website reflects the total number of cases since the outbreak began, not the active case count.
