*Residents Awaiting results of PCR test	0	
Active Positive Staff Cases	11	
**Staff being monitored (this includes positive staff cases)	17	
***Staff returned to work	72	
<p>Additional information for today. We have received communication from the Associate Deputy Minister of Long-Term Care and the Office of the Chief Medical Officer of Health (OCMOH) regarding guidance changes in visitation and outbreak management in long-term care homes. SJLCB leadership is in the process of reviewing these changes in coordination with the Brant County Health Unit. Further communication will be forthcoming.</p>		

Explanatory notes

*There are a number of reasons why residents undergo a PCR test:

- Admission / readmission
- Symptomatic of COVID 19
- Positive results on a RA test
- High risk exposure
- Surveillance testing

**Staff can be monitored for a number of reasons such as:

- They are confirmed positive
- They have tested positive on a rapid antigen test and are awaiting results of a PCR test
- they are symptomatic but have not tested positive
- they are a close contact of someone who has tested positive

***Not all staff absences are due to testing positive for COVID 19. They may have been away due to the reasons listed in the "Monitoring" section above.

Please note that the total number of cases listed on the Brant County Health Unit website reflects the total number of cases since the outbreak began, not the active case count.
