

St. Joseph's Long-Term Care COVID-19 & RSV Case Count update

Friday, Dec 9, 2022

COVID-19 Details	#	RSV Details	#	Special Considerations
Total Active Positive Resident Cases	0	Total Active Positive Resident Cases	0	<p>BCHU has declared the suspect COVID-19 outbreak on Chestnut Court to be over.</p> <p>Pine Trail remains in confirmed RSV respiratory outbreak due to pending results of 2 swabs.</p> <p>Bluebird Terrace has now been placed in suspect respiratory outbreak due to two residents now displaying RSV symptoms. Test results are pending.</p> <p>The necessary precautions have been put in place in these home areas.</p>
New cases since date of last report, (Dec 7, 2022)	0	New cases since date of last report (Dec 7, 2022)	0	
Residents Awaiting results of PCR test	4	Residents Awaiting results of PCR test	4	
Active Positive Staff Cases	2			
Staff being monitored (this includes positive staff cases)	5			
Returned to work (for period beginning Nov 15, date the last outbreak ended)	13			

New Information for today. BCHU has declared the suspect COVID-19 outbreak on Chestnut Court to be over. Bluebird Terrace and Pine Trail home areas have been placed into suspect respiratory outbreak due to residents displaying symptoms. Test results are pending.

Explanatory notes

*There are a number of reasons why residents undergo a PCR test:

- Admission / readmission
- Symptomatic of COVID 19
- Positive results on a RA test
- High risk exposure
- Surveillance testing

**Staff can be monitored for a number of reasons such as:

- They are confirmed positive
- They have tested positive on a rapid antigen test and are awaiting results of a PCR test
- they are symptomatic but have not tested positive
- they are a close contact of someone who has tested positive

***Not all staff absences are due to testing positive for COVID 19. They may have been away due to the reasons listed in the “Monitoring” section above.

Please note that the total number of cases listed on the Brant County Health Unit website reflects the total number of cases since an outbreak began, not the active case count.
