

## St. Joseph's Long-Term Care COVID-19 & RSV Case Count update

Monday, Jan 23, 2023

COVID-19 Details	#	RSV Details	#	Special Considerations
Total Active Positive Resident Cases	5	Total Active Positive Resident Cases	0	We have four positive COVID cases on Pine Trail and one COVID case on Canary Path. This includes two residents who have tested positive on Rapid Antigen tests which we consider to be presumptive positive (while we await the results of PCR tests).
New cases since date of last report, (Jan 18, 2023)	3	New cases since date of last report (Jan 18, 2023)	0	
Residents Awaiting results of PCR test	2	Residents Awaiting results of PCR test	0	
Active Positive Staff Cases	1			
Staff being monitored (this includes positive staff cases)	5			
Returned to work (for period beginning Jan 1)	14			

**New Information for today.** Due to an increasing number of COVID cases, Pine Trail residents will now be on tray service. Only one-to-one recreational activities will take place on Pine Trail. Staff and visitors on Pine Trail will be required to wear face shields. Staff on Pine Trail will now be required to wear N95 masks.

### Explanatory notes

\*There are a number of reasons why residents undergo a PCR test:

- Admission / readmission
- Symptomatic of COVID 19
- Positive results on a RA test
- High risk exposure

- Surveillance testing

\*\*Staff can be monitored for a number of reasons such as:

- They are confirmed positive
- They have tested positive on a rapid antigen test and are awaiting results of a PCR test
- they are symptomatic but have not tested positive
- they are a close contact of someone who has tested positive

\*\*\*Not all staff absences are due to testing positive for COVID 19. They may have been away due to the reasons listed in the “Monitoring” section above.

Please note that the total number of cases listed on the Brant County Health Unit website reflects the total number of cases since an outbreak began, not the active case count.
