

St. Joseph's Long-Term Care COVID-19 update

Monday, March 28, 2022

Details	#	Special Considerations
Active Positive Resident Cases	0	
*Residents Awaiting results of PCR test	2	
Active Positive Staff Cases	2	
**Staff being monitored (this includes positive staff cases)	4	
***Staff returned to work	127	
Additional information for today. SJLC will continue to require essential caregivers as well as general visitors to be fully vaccinated against COVID-19 (two vaccinations for Pfizer and Moderna or one if Johnson & Johnson). Proof is required at the screening desk. Testing requirements remain unchanged – 2-3 times a week for frequent visitors and on each visit for infrequent visitors.		

Explanatory notes

*There are a number of reasons why residents undergo a PCR test:

- Admission / readmission
- Symptomatic of COVID 19
- Positive results on a RA test
- High risk exposure
- Surveillance testing

**Staff can be monitored for a number of reasons such as:

- They are confirmed positive
- They have tested positive on a rapid antigen test and are awaiting results of a PCR test
- they are symptomatic but have not tested positive
- they are a close contact of someone who has tested positive

***Not all staff absences are due to testing positive for COVID 19. They may have been away due to the reasons listed in the "Monitoring" section above.

Please note that the total number of cases listed on the Brant County Health Unit website reflects the total number of cases since the outbreak began, not the active case count.
